# MaxxTrader 2FA

To request for 2FA on your MaxxTrader account, please contact your marketer or contact MTS Team at 6202 1879.

1. Email will be sent notifying that 2FA has been activated for your account

2. Login to MaxxTrader

3. You will see the screen prompting you to setup two-factor authentication

4.In the next screen, user will be presented a QR code which they can scan using ***"Google Authenticator"** app. By scanning the QR code, the app will read embedded secret code inside the QR code.

5. A six digit verification code will be generated in the "Google Authenticator" app and user will need to key that in for the first time verification

6. Once done, 2FA is activated for the user. At this point, user is given a list of recovery code which can be used in the event that he/she loses his phone.

*Other 3rd-party authenticator mobile application can be used as well

Setup two-factor authentication

Two-factor authentication helps to make your account more secure. It adds an extra layer of protection, besides your password.

In order to setup two-factor authentication, please download Google Authenticator app from Apple Store or Play Store on your smartphone.

Setup two-factor authentication

Please note down or save recovery codes below in a secure place. Recovery codes can be used to access your account in the event you lose access to your smartphone and cannot receive two-factor authentication codes.

Treat your recovery codes with the same level of attention as you would with your password!
