DISA

(DISA SP/532.SI)

World's First Fully Digital Asset Protection Technology

Event

Since its invention of the world's first anti-theft protection technology that uses encrypted codes on consumer electronic products, DISA has focused all its resources on its anti-theft business and continues to ramp down its other businesses with revenue from technology making up 64% of total revenues at 9M2018. Given that Walmart is now using DISA's technology, we believe the time is ripe for the firm to ramp up its market penetration.

Based on our projections, we forecast DISA to breakeven in FY21F and revenue growth at a CAGR of 135% from 2017 to 2021F. We initiate coverage on DISA with a BUY recommendation and a target price of S\$0.02, based on a DCF valuation with WACC at 14.5% and terminal growth rate at 0%, implying a 2021F P/E of 23.9x.

Impact

Not Just Walmart. The company has captured headlines since its proof of concept trials with Walmart and we understand from management that this is a high barrier to entry business as Walmart's point of sale system contains sensitive data on walmart stores and supplier's sales, which is why it took DISA 2 years from its initial talks with Walmart to full implementation across all Walmart stores. While Walmart's acceptance provides support for DISA, we believe DISA's Point-of-Sale Activation (PoSA) approval from industry groups and security firms will add further weight to the company's expansion plans.

First Mover Advantage. As the first mover providing a digital point of sale activation solution, we believe that the company would be able to get at least 3 top US retailers onto its platform. From these 3 retailers, we estimate that DISA will have access to a pool of 77 billion barcodes, which translates to \$3.9 billion in revenue if all the suppliers from these retailers decide to adopt DISA's technology. However, as food products are unlikely to use PoSA due to costs and practicality reasons, we expect DISA to penetrate a portion of the available barcodes rather than all the available barcodes. From these projections, we forecast net revenue to grow at CAGR 135% from 2017 to 2021F with breakeven by 2021F.

Risks

Slow user adoption and a breach in DISA's encryption could lead to reputational damages and a decline in revenue. **Going concern** could become a problem if DISA fails to scale and cover its burn rate.

Investment Thesis

Not Just Walmart

In 2016, Walmart began testing DISA's Point-of-Sale Activation (PoSA) system with proof-of-concept trials in a Walmart store in Arkansa and after a 6-month trial period, Walmart began a roll-out of DISA's solution across the United States. With positive results from Walmart, the company recognised revenue from its anti-theft solutions for the first time, recording revenues of \$\$90,000 for FY17.

Figure 1: Walmart One-Store PoSA Pilot Program Results

One Store Pilot Program	% of Customers Surveyed
Noticed PoSA in-store set-up	70%
Understood the Technology based solely on display sign or box-mark	50%
More convenient alternative than other loss prevention practices to secure product in-store	100%
Preferred the shopping environment created by PoSA as compared to alternative loss prevention solutions	80%

20-Store PoSA Test	% of Customers Surveyed
PoSA is easier, more convenient access to	
products before purchasing, leading to	61%
improved customer shopping experience	
Prefer PoSA to other in-store product	67%
protection options*	0776
PoSA is a very favorable solution*	56%
*Survey conducted with asset protect	ction managers

Source: Loss Prevention Research Council, DISA

We understand from management that getting Walmart on-board was a lengthy process due to the sensitivity of data on retailer's point of sale systems (POS). If POS systems are compromised, sales and suppliers data could be leaked, which is why Walmart took a long time to test DISA's system. As such, it is very likely that retailers will only support one solution as the industry standard and once retailers are on-board, suppliers should soon follow.

Product Requires
Activation Code

Source: Company Presentation

Figure 3: Industry PoSA Logo

Industry Adoption: In our view, the company is on track to become the industry standard as the Loss Prevention Research Council (LRPC), an industry group of retailers, solution providers and scientists, has designed a universal box-mark to represent all PoSA technology, with the logo reflected on all PoSA-embedded products. According to LPRC's studies, the usage of this box-mark has been well received by loss prevention managers and can help to deter potential offenders in retail stores.

Not Just Walmart: Besides Walmart, DISA's PoSA system has received security certification from BugCrowd, a crowd-sourcing platform of computer hackers which hunts for bugs and penetration loopholes on new products. Notable customers of BugCrowd in the past have included tech and finance companies such as Western Union, Pinterest, FitBit, AVG Technologies, Tesla and others.

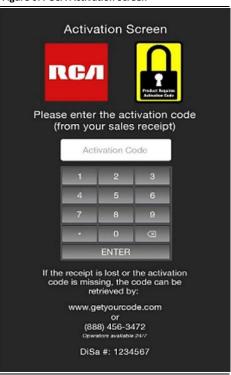

In our view, getting the security certification was a key milestone towards industry-wide acceptance of PoSA as this was a requirement placed on DISA from the largest US retailers which includes Target, Walmart, Best Buy, Home Depot, Lowes and others.

Ready to Scale: Eventually, these successful trials led to DISA's win at the 2017 (R)Tech Asset Protection Innovation Awards, an award given by Retail Industry Leaders Association (RILA) to technologies that mitigate total retail loss. Given that members of RILA and LRPC includes the largest US retailers like Walmart and Target, we believe these awards and successful trials has helped DISA reached its targeted audience.

First Mover Advantage

Shrinkage refers to the loss of inventory that can be attributed to factors such as employee theft, shoplifting or supplier fraud. While retailers try to mitigate losses from shrinkage through various measures such as video surveillance, shrinkage remains a rampant problem globally, especially in North America.

According to Checkpoint's Global Retail Theft Barometer, global shrink costs for retailers rose to \$123.4 bn in 2015 from \$107.3 bn in 2010, which translates to an average of 1.23% of global retail sales in 2015. Among 4 regions, North America was the worst, with retail shrinkage estimated at 1.97%.

Figure 4: Global Retail Theft Barometer **Global Retail Shrinkage** 2015 2014 Change% Estimated Value (\$ Bn) 0.91% Asia Pacific 1.11% 0.20% Λ 39.0 0.96% 1.02% -0.06% \downarrow 40.9 Europe 个 Latin America 1.82% 0.75% 1.07% 10.8 \uparrow North America 1.97% 1.28% 0.69% 36.8 Global 1.42% 0.92% 0.50% \uparrow 123.4

Source: Checkpoint Systems, The Smart Cube

At the product level, retailers have used a combination of methods such as Electronic Article Surveillance (EAS), spider wraps or secure cable devices. These methods require hardware and often restrict consumers from accessing the products freely, which might lead to a decrease in sales. With DISA's solution, retailers can now stock product on the sales floor without fear of theft and enjoy cost savings as they no longer need to repurchase hardware for loss prevention solutions.

As the first mover providing a digital point of sale activation solution, we believe that the company would be able to get at least 3 top US retailers onto its platform. Based on this assumption, we estimate that 3 retailers would yield a combined 771 million in stock keeping units (SKUs). While it is impossible to estimate the amount of barcodes per SKU, we assume that suppliers would order at least 100 barcodes per SKU to keep an adequate amount of stock in a large retailer, which translates to 70 billion barcodes in 3 large retailers. From these projections, we forecast net revenue to grow at 135% from 2017 to 2021F with breakeven by 2021F.

Valuation

We initiate coverage on DISA with a BUY recommendation and a target price of S\$0.02 which represents an upside of 100%. Our target price is based on a DCF valuation, implying a 2021F P/E of 23.9x.

Earnings: Valuation of DISA was based on earnings improvement from (-0.26) cents in 2017 to 0.10 cents by 2021F, driven by the ramp-up its anti-theft technology in the United States.

Margins: We expect gross margins to increase by 45 ppt from 2017 to ~80% by 2021F, while operating and net margins should turn positive by 2021F at 32% and 24% respectively. In aggregate, these will be driven by a diminished increase in staff costs and an improving operating leverage.

SKUs and Barcodes: We estimated the total potential SKUs of 3 large US retailers (including Walmart) endorsing DISA's anti-theft technology, based on the average SKUs available at a large retail store in the United States. Our assumptions include a minimum of 100 items per SKU annually, which translates into 100 barcodes per SKU per annum. From these assumptions, we estimated a combined minimum of 771 million SKUs per annum and a minimum of 77 billion barcodes which could be available to DISA.

However, since food products are unlikely to use the technology due to costs and practicality reasons, we believe that DISA can only capture a portion of the combined SKUs or barcodes. From DISA's 2017 revenues, we estimated that the company sold 1.8 million barcodes to Walmart's suppliers and if we assume a similar penetration rate, this would translate into 2.7 million barcodes from the suppliers in 2018F. By 2019F, we expect higher supplier penetration rates due to the increased number of retailers endorsing DISA's technology, resulting in sales of 115 million barcodes.

Industry Leader: In summary, our estimates are based on the main assumption that the company is now at an inflection point and DISA will become the market leader if it can get 2 other large US retailers other than Walmart, to endorse their technology. In such a scenario, we believe that DISA will enjoy exponential growth rates in barcode sales, which is why we forecast the number of barcodes sold to increase by a CAGR of 203% to 462 million by 2021F from an implied 1.8 million barcodes sold in 2017.

Operational and financial review

Stronger balance sheet but risks remain

The company has come a long way from 2015 when their ability to function as a going concern was flagged out as a risk by auditors. Since October 2016, the company has managed to attract new investors to provide financing via share and convertible bond issues, leading to a much stronger balance sheet. As of FY17, current debt/cash has fallen to 3.57% from 140% in FY16. While we expect DISA's current balance sheet to support its cash burn, we remain wary of the \$12mn convertible bond that could mature on 23 December 2018 if there are no conversion to equity. These convertible bonds were issued together with 4 investors on 27 December 2016, allowing them to convert the bonds into the company's ordinary shares at any time between 23 December 2017 and 23 December 2018.

We are of the view that the company might fail to refinance the bond if DISA's technology does not make much progress from 2018 – 2019. In such a scenario, the company could find it hard to sustain its cash burn and going concern risks might surface again.

Figure 9: Current Debt/Cash trend 160.0% 140.0% 120.0% 100.0% 80.0% 60.0% 40.0% 20.0% 0.0% FY18 FY19 FY20 FY21 FY14 **FY17**

Controlling Employee Expenses

Due to the underperformance of DISA's legacy businesses, employee's expenses have been a huge drag on past earnings. Since 2014, director fees have consistently averaged 28% of employees benefit expenses while salaries and bonuses have fallen from 61% in FY14 to 40% in FY 17. While the company has a culture of awarding shares and stock options to its staff to incentivise performance, we believe this is an area where prudence should be warranted, especially if operating activities remains cash flow negative.

Measured against total revenues, employee benefits expense has grown from 0.98x in 2014 to 11x in 2017, even as the company continued making losses. While we expect another surge in FY18 due to the hiring of executives in the United States to scale its business, we are of the view that a successful roll-out of its anti-theft technology would allow the company to keep its employee expenses under control by FY19.

Source: Company Data, KGI Research

Operating Costs and Legacy Issues

One of biggest contributors to DISA operating leverage has been impairment losses from its legacy businesses. In 2017, the firm took an impairment loss of \$8.5mn with impairment on prepayment for rights of granite and trade receivables adding up to \$5.9mn and \$2.6mn respectively. DISA's legacy business assets have been classified as non-current assets and trade receivables on its balance sheet. With the latest write down, the total amount on trade receivables and non-current assets has dropped to \$905,000 and \$120,000 respectively. At these levels, we expect costs relating to DISA's legacy businesses to have much smaller impacts to its earnings going forward, unless there are new lawsuits in the future.

Without any new huge impairment, we are expecting the company's operating leverage to begin improving from FY18 onwards and we forecast operating leverage to improve from 55x in FY17 to 0.5x by FY21. Legal fees however, would continue to be a cost driver due to current enforcement proceedings against KDH.

Key risks

Slow User Adoption

Suppliers and retailers might have a slower than expected adoption rate of DISA's technology. A slower adoption would lead to lower revenue which could be detrimental to the company given its current cash burn of \$6mn to \$7mn a year.

Encryption Breaches

Retailers will have trust in DISA's encryption technology after the company successfully completed penetration tests by BugCrowd and rolled out its solution system across Walmart stores. If hackers manage to break its encryption and allow thieves to use stolen products again, retailers and suppliers might lose confidence and stop using PoSA. Legal costs could also spike in such a scenario.

Going Concern Risks

The company is currently at an inflection point and must successfully convince retailers and suppliers to adopt their technology as the industry standard. In a scenario where the company is unable to scale convincingly, debt and equity financing solutions could dry up as investors lose confidence.

As a technology company, there could also be unexpected costs required to refine and improve its IT infrastructure and all of these could add to the cash burn rate. Like most tech firms at their inflection points, it is critical that the company maintains the trust of investors to finance their cash burn in order to scale up the business.

Company Overview

Investment Holding Company

DISA is an investment holding company operating in three core business segments, which includes Technology, Energy Management Services and the Supply of Construction Materials. Since its invention of the world's first anti-theft protection technology, the company has focused most of its resources on its technology business.

TECHNOLOGY Disa Digital Safety (Shenzhen) Limited (Shenzhen) Limited

Source: Company Data

Digital Safety (DISA): Disa's digital asset-protection solution, also known as the Point-of Sale Activation ("PoSA") solution, is the world's first anti-theft protection technology that uses encrypted codes on consumer electronic products to safeguard retailers and manufacturers of consumer electronic products against theft and return fraud. The technology keeps products nonfunctional until the point of payment by consumers in retail stores.

After making payments, the customers will receive a one-time activation code on their receipts which allows them to unlock their device. PoSA's products are systematically and digitally locked during the manufacturing process (embedded in the firm ware) and require only a single-scan for retailers at the point of purchase. Single-scan solutions are ideal for retailers as there are no additional hardware costs from scanners.

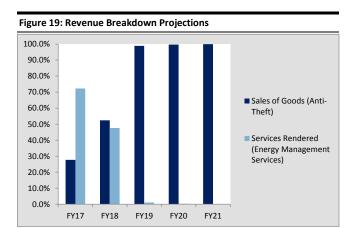

Source: Company Data

With PoSA, retailers can provide open sale of products with a non-assisted self-checkout option for the customer and the technology has already been implemented in over 2,000 consumer electronics retail stores across the United States, including Walmart, which has entered an agreement with DISA to implement the solution in their stores in the United States.

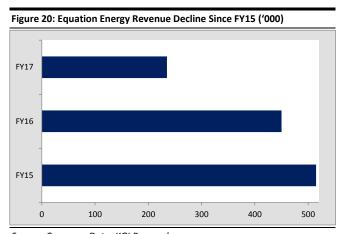

Energy Management Service (Equation Energy): Equation energy provides sustainable energy management solutions to the building industry in Singapore and to the region. Core services cover energy auditing and management, design and consultancy, funded solutions in energy performance contracting as well as distribution of niche energy-saving products and equipment to the building industry. While this segment made up 72.3% of DISA's total revenue in FY17, we expect it to become a minority segment as DISA scales its anti-theft technology in the United States.

Supply of Construction Materials (Equation Resources): Equation Resources has been discontinued during FY14. Previously, the company was is in the business of supplying and trading of construction materials including sand, granite and coal. The company paid 100% rights, interest in and ownership of granite to PT Kawasan Dinamika Harmonitama (KDH) with more than 10 million metric tonnes reserve.

Source: Company Data, KGI Research

Shrinkage Market

Rampant Problem in the United States

For decades, shrinkage has been a rampant problem for retailers and manufacturers globally. In the United States, an industry survey from the National Retail Federation (NRF) reported an average shrink rate of 1.44%, which cost the overall U.S. retail economy \$48.9 billion in 2016. Additionally, shrinkage was found to be trending higher at a time when two-thirds of loss prevention (LP) budgets are either flat or declining. While there are various sources of shrinkage, the majority comes from shoplifting and employee theft.

Figure 21: Source of Shrinkage 5.40% 36.50% 21.30% ■ Shoplifting ■ Employee Theft ■ Administrative Error Vendor Fraud Unknown Loss

Figure 22: Shrinkage Trends 39% 34% 29% ■ Shoplifting 24% ■ Employee Theft Administrative Error Vendor Fraud 14% Unknown Loss 9% 2015

Source: National Retail Federation, KGI Research

Besides inventory losses from employee theft and shoplifting, retailers are also challenged by return fraud due to liberal return policies. According to the NRF, the average costs of return fraud are estimated at \$1,766.27, more than twice the average costs of shoplifting at \$798.48. Compared to robbery, combined average costs of shoplifting, employee theft and return fraud amounted to \$4,487.55, which is 0.85x of a robbery. Therefore while theft and return fraud has less violence involved, the combined costs affects a retailer like a robbery.

Due to shrinking loss prevention methods, mitigating measures such as actions against shoplifters or dishonest employees have dropped significantly. Costlier methods for screening out dishonest employees such as drug screening, driving history and credit checks have also dropped significantly.

Challenged by e-commerce platforms, retailers are facing tighter margins but growing shrinkage costs, which means this is a problem they must address in order to improve results. Current loss prevention solutions however, have been inadequate and ineffective in combating shrinkage.

Loss Prevention Solutions

Since Electronic Article Surveillance (EAS) debuted in the 1990s, the world has not seen much major developments in solutions to mitigate theft and return Other than EAS, retailers have been using similar but ineffective loss prevention solutions such as spider wraps or installing CCTV and alarms at the store level.

According to the Global Retail Theft Barometer, electronics/appliance/media products specialist retailers spent the maximum amount on loss prevention solutions due to the high value and mass appeal of these products that make them lucrative for thieves. Besides electronics retailers, supermarkets, convenience stores and grocery retailers also reported high spending in loss prevention solutions.

However, even though loss prevention equipment used to protect these products are expensive, they have not been effective in combating shrinkage, as evidenced by growing the exorbitant costs of shrinkages today.

Figure 25: Global Loss Prevention Solutions at Store Level (2015)

Solution	% of Respondents Using
CCTV/DVR	76%
Security Guards	61%
Alarm Monitoring	60%
Logistics-related Solutions (GPS, truck seal program, etc.)	44%
Foot Traffic Counters	43%
Door Seals/MAG	43%
POS EBR (exception-based reporting)	40%
Advanced Data Analytics	35%
Parking Lot Protection	31%
Advanced Access Control (key card,biometric technology, etc.)	29%
Motion Detection Alerts	21%
Other Protection Methods	9%
Facial/Customer Recognition Technology	3%

For the loss prevention solutions market, DISA has introduced a software solution which can be a potential game changer as it not only allows retailers and suppliers to open sell their high-value products, it also reduces security infrastructure costs for both suppliers and retailers. For consumers, PoSA can be used as a time-saving solution at POS/self-checkouts due to its single scan solution, which has no need for a security fixture removal.

Appendix

Key Management	
Chng Weng Wah Managing Director, Chief Executive Officer	Mr. Chng joined DISA Limited in February 2005 as the Group's Executive Director and Chief Executive Officer. He steers the Group towards its vision and strategic direction. Mr. Chng has a diverse background of versatile experience in various industries which cover the fields of product development, innovation; and marketing and sales. He received the Asia Europe Young Entrepreneurs Award at the Berlin Asia Europe Young Entrepreneurs Forum in 1999. Mr. Chng also sits on the Board of LifeBrandz Limited as its Non-Executive Director.
Low Chuan Jee Chief Financial Officer	Ms. Low is responsible for the finance, compliance and reporting functions of the Group. Her post-graduation experience in various capacities includes audit, financial accounting and she has worked in various public-listed companies. She holds a Bachelor of Accountancy from Nanyang Technological University, Singapore and is a Chartered Accountant ("CA Singapore") of the Institute of Singapore Chartered Accountants ("ISCA").
Wong Ah Kiow Financial Controller	Ms. Wong was appointed in August 2010. She is a CA Singapore with ISCA. She is also a fellow member of Association of Chartered Certified Accountants and a member of Malaysian Institute of Accountants. She has many years of working experience in the manufacturing industry, both local companies listed in Malaysia and multinational company listed in Singapore. Prior to this, she was an external auditor. Her main responsibilities include overseeing the entire DDSPL group finance team, management reporting function as well as strategic financial planning and compliance related matters
Ng Kay Choong Senior Vice President, Global Solution of DDSPL	Mr. Ng joined DDSPL in March 2017. He is responsible for the integration of the DiSa solution into retail products. He has over 20 years of factory experience with different major production organizations. He holds a Bachelor of Engineering from Nanyang Technological University, Singapore.
Pham Hoang Bao Head of Global Information Technology of DDSPL	Mr. Pham joined DDSPL in December 2016. He is responsible for the planning, implementation and operation of information technology. He was the Lead Solution Architect in CIMB Securities from 2011 to 2016. He holds a Master in Communication Software and Network and a Bachelor of Computer Engineering from Nanyang Technological University, Singapore
Adam Hartway Chief Executive Officer, Disa Digital Safety, USA	Mr. Hartway joined the Group in July, 2009 and is currently the Chief Executive Officer of DiSa USA. He has been engaged in the retail industry for more than 30 years. He held positions in retail sales, store management, purchasing, vendor engagement, channel sales, director of sales and channel solution-based implementation of new technology & process. Mr. Hartway was awarded the 2013 Loss Prevention Research Council Award for individual leadership and technology implementation.
Christopher Roberts Specialist in PoSA Engagement of Disa USA	With direct hands on experience implementing the PoSA solution at a major United States ("US") retailer, Mr. Roberts will work closely with other US retailers to successfully guide them on their PoSA implementation.
Han Yang Kwang Chief Executive Officer, Disa Digital Safety, Shenzhen	 Mr. Han has been engaged in the manufacturing industry for more than 15 years. He started his career with Hewlett Packard and Texas Instruments. Mr. Han holds a Bachelor of Electrical and Electronics Engineering from National University of Singapore.

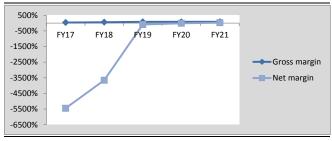

Figure 27: Company profile

DISA, formerly known as Equation Summit Limited, is an investment holding company listed on the SGX Catalist since 1992. Since 2006, the Group has actively reviewed its businesses to focus on high-value services with long term potential while divesting non-core segments to complement its growth. Today, through its subsidiaries, the Group operates in three core business segments, which includes Technology, Energy Management Services and the Supply of Construction Materials. The Group has offices in Singapore, Germany, China and the United States.

BUY >10% total return over the next 12 months

HOLD -10% to +10% total return over the next 12 months

SELL <-10% total return over the next 12 months

Disclaimer

This report is provided for information only and is not an offer or a solicitation to deal in securities or to enter into any legal relations, nor an advice or a recommendation with respect to such securities. This report is prepared for general circulation. It does not have regard to the specific investment objectives, financial situation and the particular needs of any recipient hereof. You should independently evaluate particular investments and consult an independent financial adviser before dealing in any securities mentioned in this report.

This report is confidential. This report may not be published, circulated, reproduced or distributed and/or redistributed in whole or in part by any recipient of this report to any other person without the prior written consent of KGI Securities. This report is not intended for distribution and/or redistribution, publication to or use by any person in any jurisdiction outside Singapore or any other jurisdiction as KGI Securities may determine in its absolute discretion, where the distribution, publication or use of this report would be contrary to applicable law or would subject KGI Securities and its connected persons (as defined in the Financial Advisers Act, Chapter 110 of Singapore) to any registration, licensing or other requirements within such jurisdiction.

The information or views in the report ("Information") has been obtained or derived from sources believed by KGI Securities to be reliable. However, KGI Securities makes no representation as to the accuracy or completeness of such sources or the Information and KGI Securities accepts no liability whatsoever for any loss or damage arising from the use of or reliance on the Information. KGI Securities and its connected persons may have issued other reports expressing views different from the Information and all views expressed in all reports of KGI Securities and its connected persons are subject to change without notice. KGI Securities reserves the right to act upon or use the Information at any time, including before its publication herein.

Except as otherwise indicated below, (1) KGI Securities, its connected persons and its officers, employees and representatives may, to the extent permitted by law, transact with, perform or provide broking, underwriting, corporate finance-related or other services for or solicit business from, the subject corporation(s) referred to in this report; (2) KGI Securities, its connected persons and its officers, employees and representatives may also, to the extent permitted by law, transact with, perform or provide broking or other services for or solicit business from, other persons in respect of dealings in the securities referred to in this report or other investments related thereto; and (3) the officers, employees and representatives of KGI Securities may also serve on the board of directors or in trustee positions with the subject corporation(s) referred to in this report. (All of the foregoing is hereafter referred to as the "Subject Business".)

However, as of the date of this report, neither KGI Securities nor its representative(s) who produced this report (each a "research analyst"), has any proprietary position or material interest in, and KGI Securities does not make any market in, the securities which are recommended in this report.

Each research analyst of KGI Securities who produced this report hereby certifies that (1) the views expressed in this report accurately reflect his/her personal views about all of the subject corporation(s) and securities in this report; (2) the report was produced independently by him/her; (3) he/she does not carry out, whether for himself/herself or on behalf of KGI Securities or any other person, any of the Subject Business involving any of the subject corporation(s) or securities referred to in this report; and (4) he/she has not received and will not receive any compensation that is directly or indirectly related or linked to the recommendations or views expressed in this report or to any sales, trading, dealing or corporate finance advisory services or transaction in respect of the securities in this report. However, the compensation received by each such research analyst is based upon various factors, including KGI Securities' total revenues, a portion of which are generated from KGI Securities' business of dealing in securities.
